Office Action Summary

Art Unit: 1724

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20 and 30-32, drawn to an assembly for receiving waste products having a bearing surface or closure allowing selective location of an inlet.

Group II, claim(s) 21-29, drawn to a grate assembly with an overflow tower.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group II lacks the technical feature of a bearing surface or closure allowing selective location of an inlet. The invention of Group I lacks the technical feature of a grate with an overflow tower.

A telephone call was made to Mr. Thomas Galgano on July 2, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
